

SOLID-2

- ↳ Decoupling
- ↳ Single Resp.
- ↳ open-close

Taikant → the class has 2 responsibilities

- ↳ calculating Area
- ↳ calculating volume

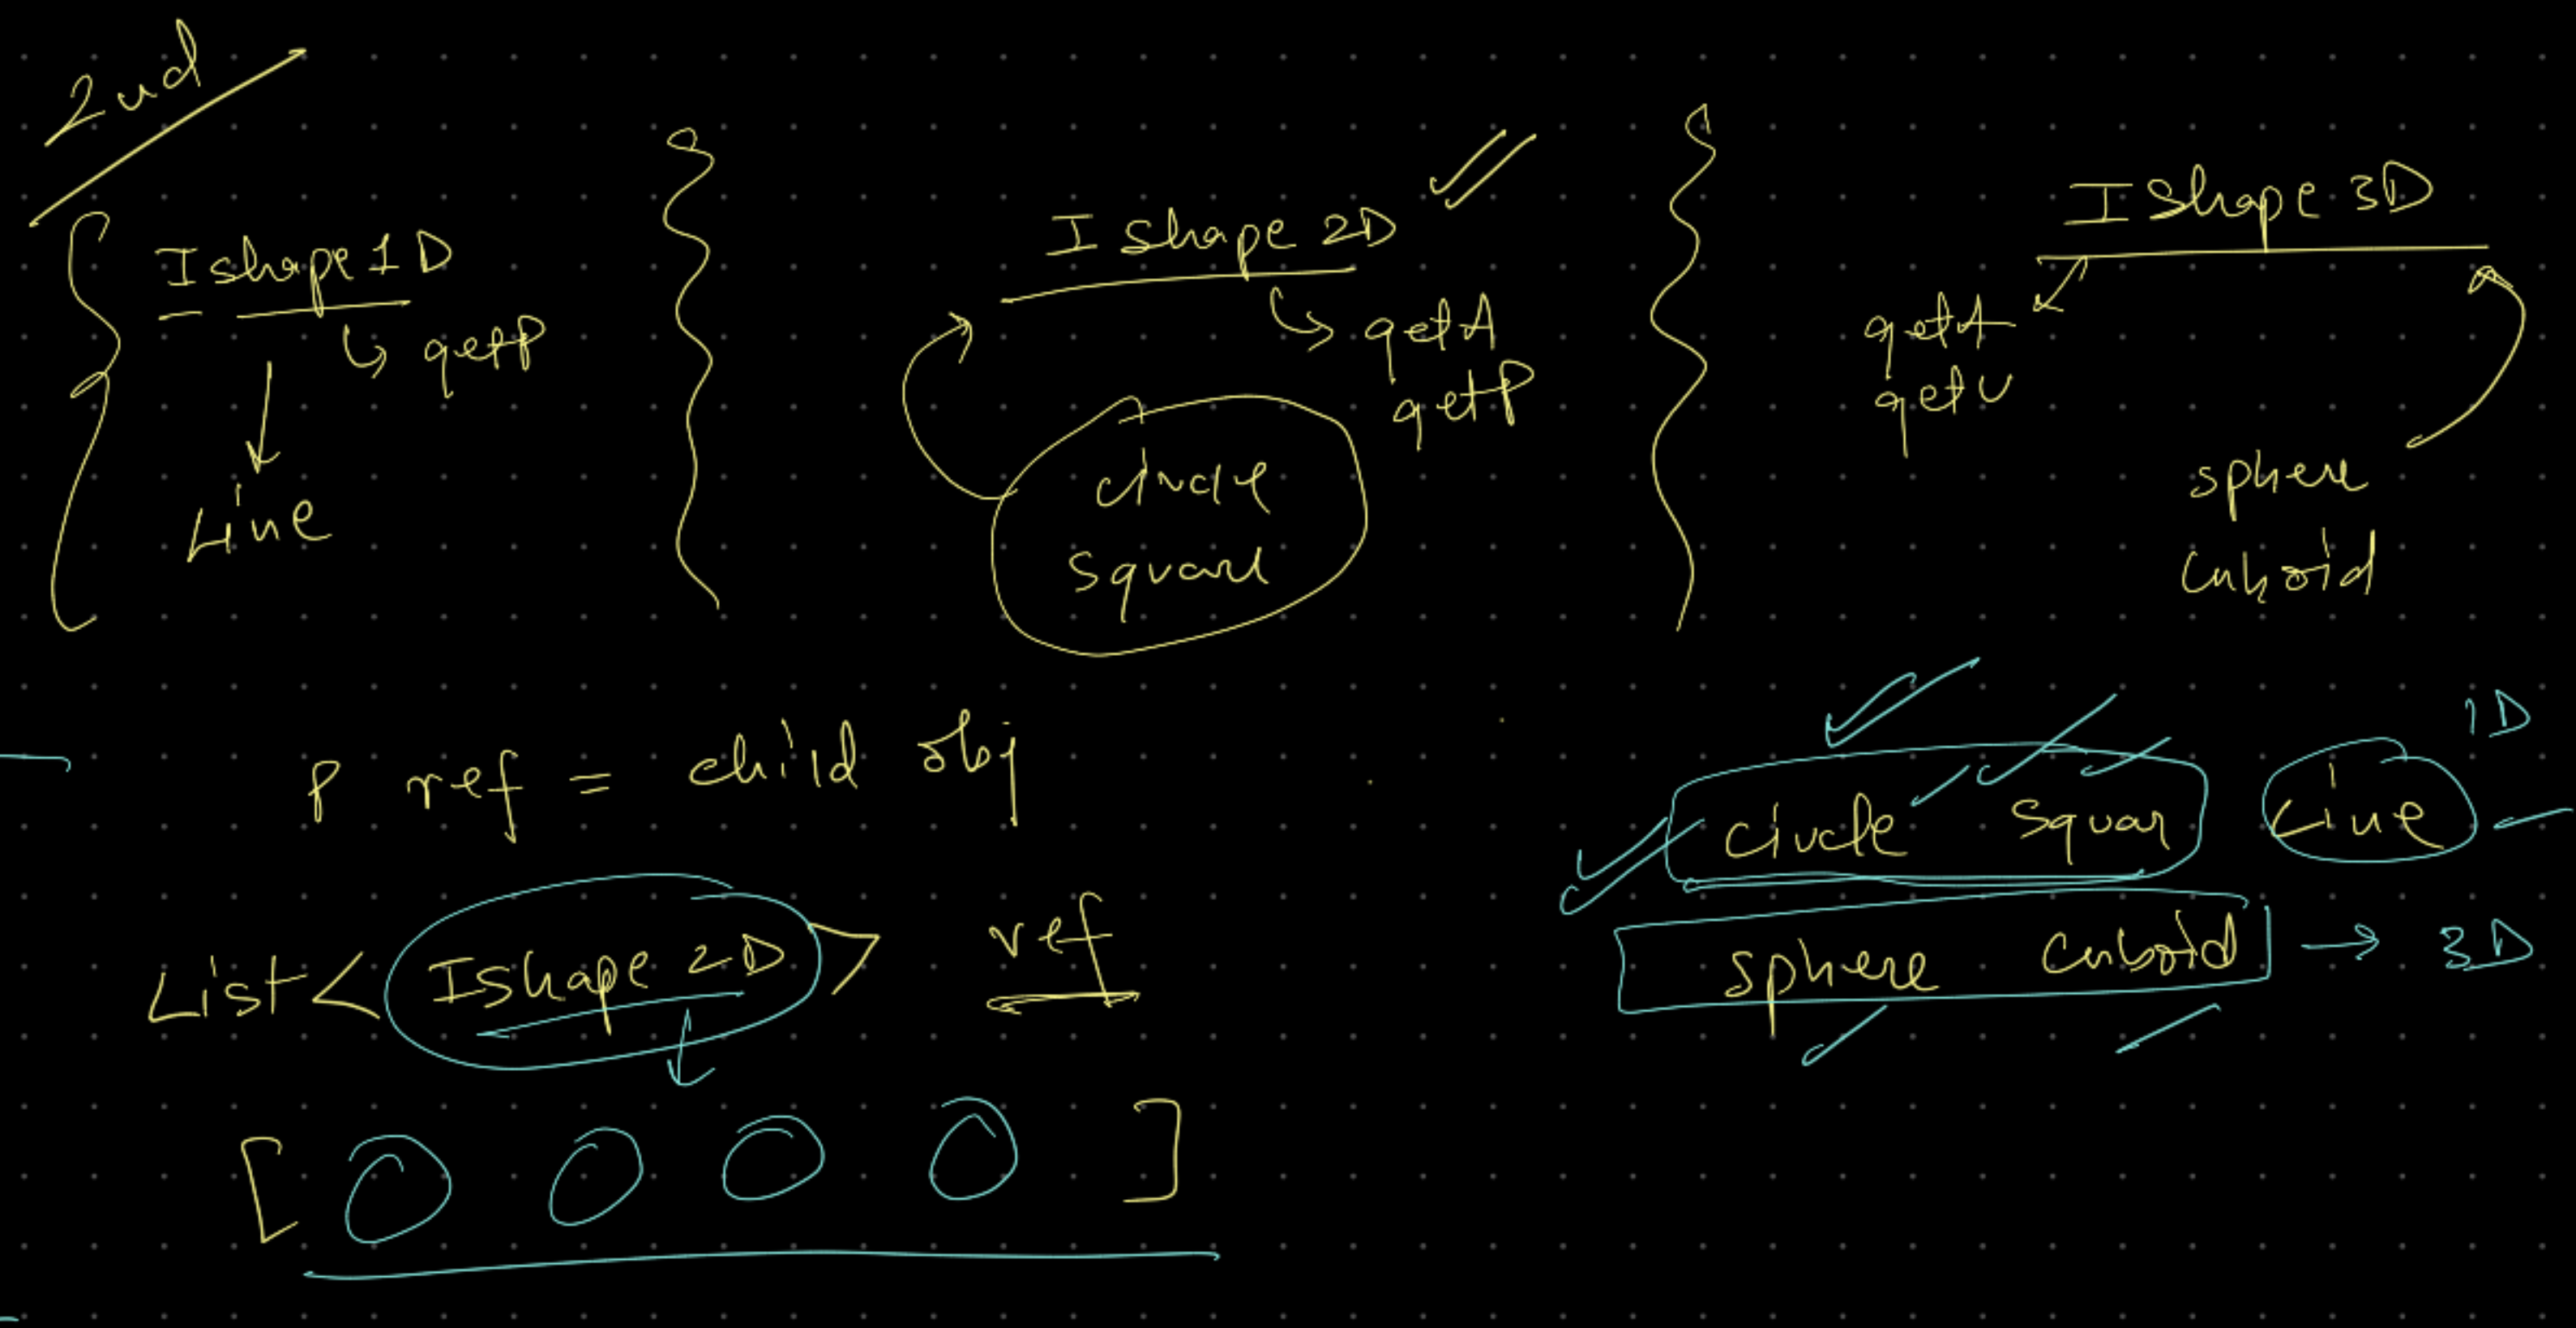

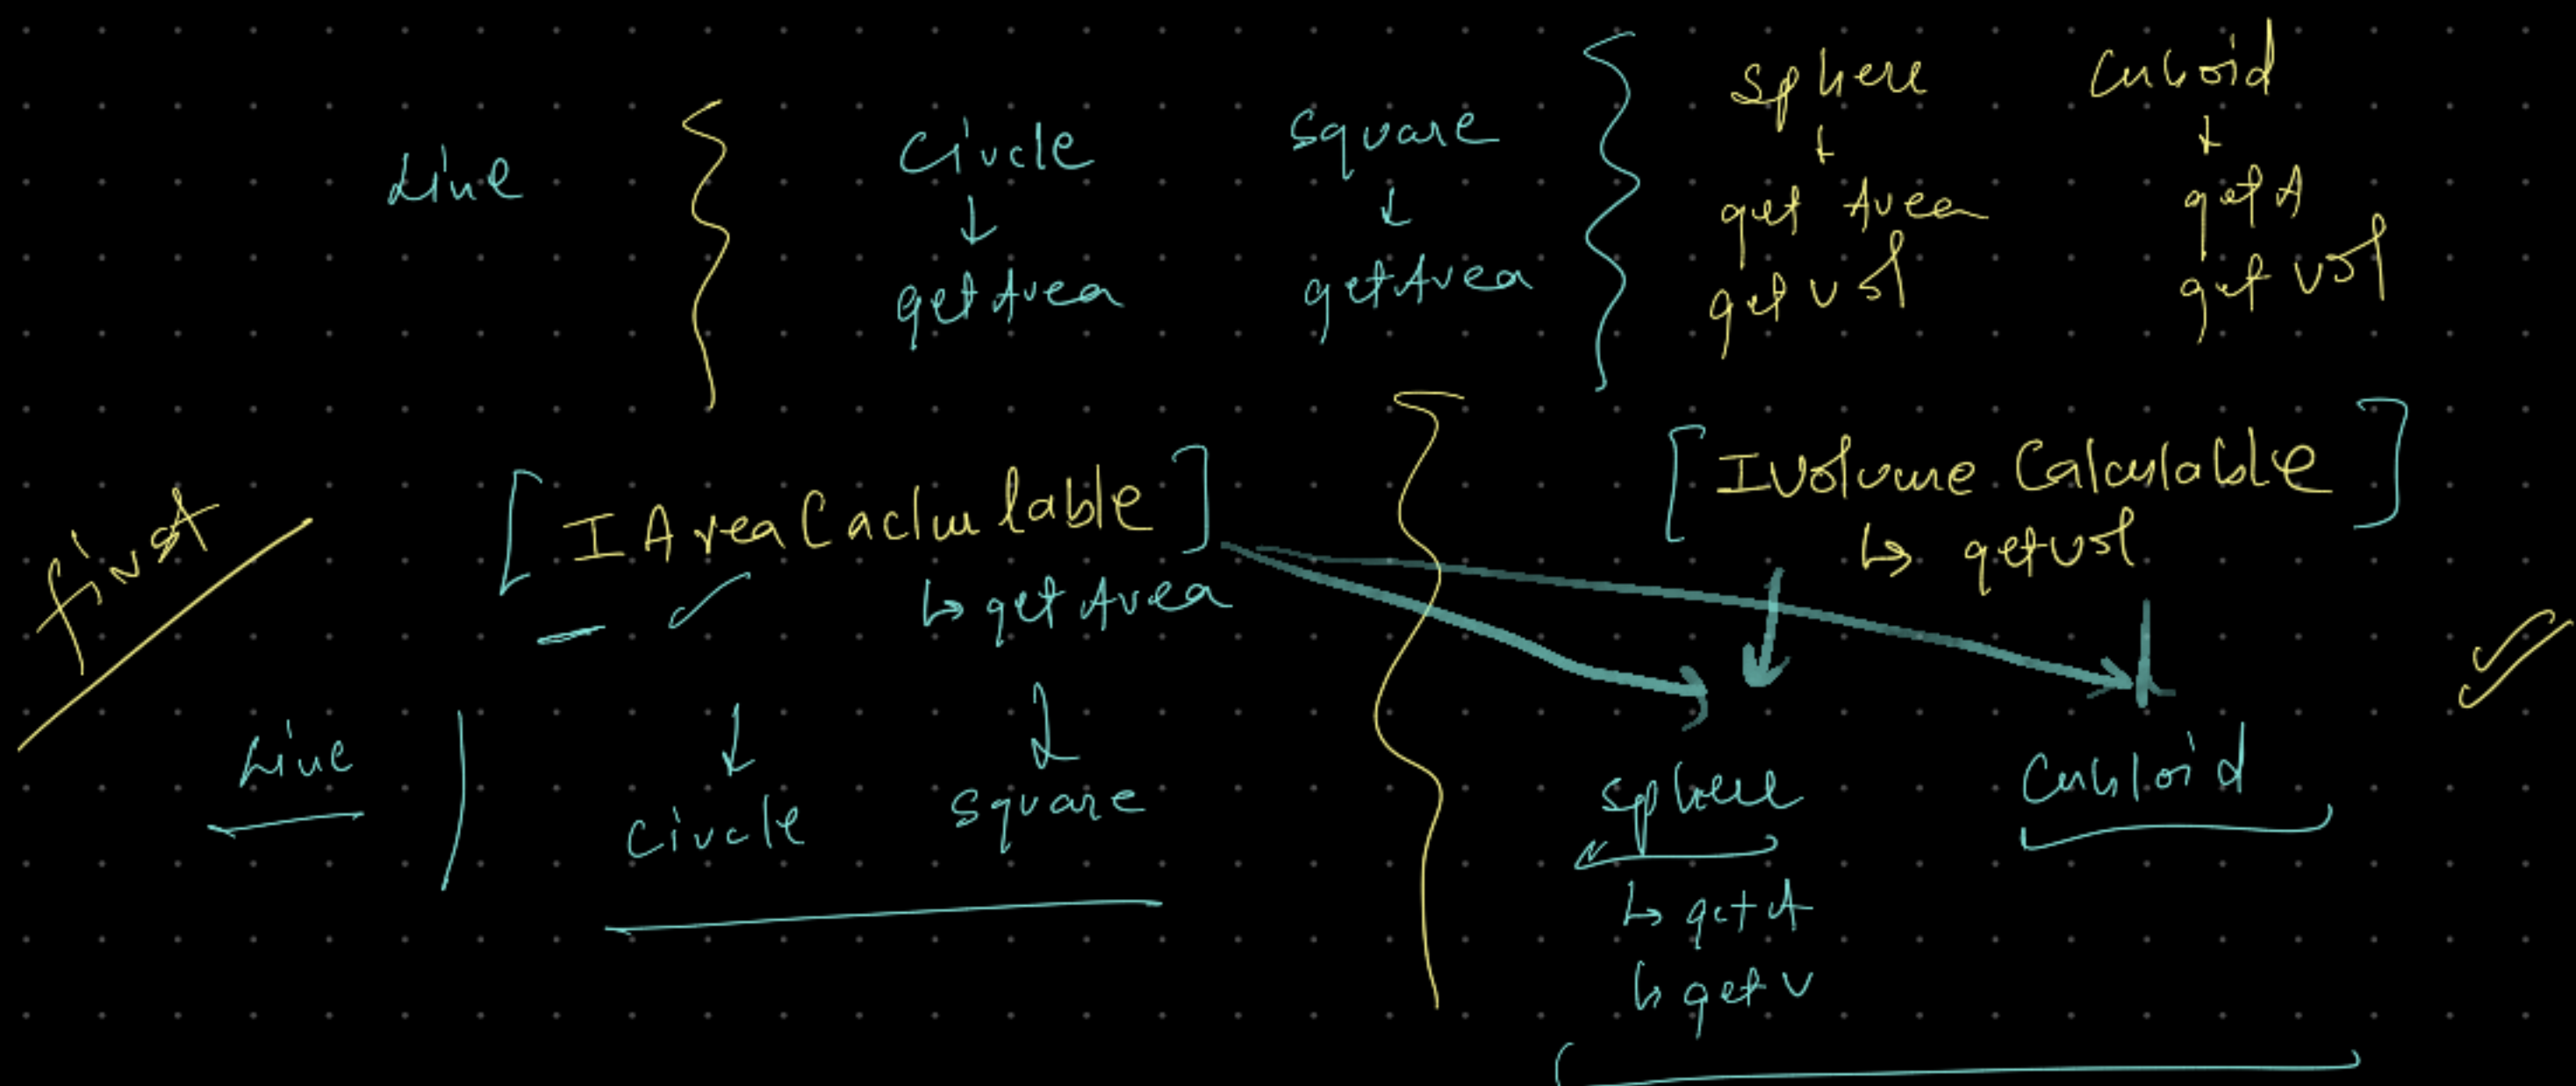

Interface shape {
getArea ();
getVolume ();
}

{ Line → shape
circle → shape
Rectangle → shape
sphere → shape
Cuboid → shape }

The problem: →

Our shape interface is forcing child classes to implement functions which the children should not have

(I)
